

System 636[®] TERMINATION KITS

PRODUCT INFORMATION BULLETIN

System 636[®] Termination

Three ULC S636 certified ways to terminate your System 636[®] Flue Gas Venting system

Concentric Kits (PVC & CPVC)

System 636 Concentric Kits, are available in a variety of lengths and come in 2", 3" and 4" diameters. These "pipe-in-pipe" kits allow for both exhaust and intake pipes to penetrate the roof or side wall through only one hole. The concentric vent kits are now certified with mechanically fastened rain caps. When installed with the included stainless steel screw/nut the rain cap can be easily removed for cleaning or replacement. Vent screens and round face plates for side wall terminations are also available, see reverse.

FGV Concentric Vent Kits

Longer barrel length options allow for greater flexibility during installation. Required for steeper pitched roofs, and is ideal for high snow load areas.

PVC (white)		
Size		Product Code
in	mm	
2 x 16	50 x 400	196005
2 x 28	50 x 700	196105
2 x 40	50 x 1000	196125
3 x 20	75 x 500	196006
3 x 32	75 x 800	196106
3 x 44	75 x 1100	196116
4 x 36	100 x 900	196021

CPVC (grey)		
Size		Product Code
in	mm	
<i>new</i> 2 x 16	50 x 400	197040
<i>new</i> 2 x 28	50 x 700	197033

Wall Termination Kits (PVC)

For a traditional vent style, IPEX's PVC Side Wall Vent Kits are available in convenient 2", 2-1/2" and 3" sizes. These PVC kits require only two small wall penetrations for intake and exhaust. Kits include a white finishing plate with a self sealing foam back that can be screwed to the exterior wall. Vent screens not included.

Wall Termination Kits (PVC)	
Size	Product Code
2"	081216
2-1/2"	081218
3"	081219

Low Profile Termination Kits (PVC)

The kits offer a lower profile alternative to the typical two pipe side wall termination kit. They include integrally molded vent screens, and the design neatly disguises both the intake and exhaust. Each kit is molded with a ULC S636 certified beige PVC compound.

Low Profile Termination Kits (PVC)	
Size	Product Code
2"	196984
3"	196985
4"	196986

System 636[®] Termination Accessories

Vent Screens

IPEX also offers 2", 3", 4", 6" and 8" vent screens to prevent debris and rodents from entering and plugging the venting system. The uncertified vent screens can be friction fit in any IPEX termination kit.

Vent Screens	
Size	Product Code
** 2"	196050
** 3"	196051
** 4"	196052
* 6"	196090
* 8"	196091

* Stainless Steel, **Polyethylene

Round Face Plates

These round face plates are the perfect accessory for single wall penetrations like the Concentric Vent Kits, or in instances where two pipes are too far apart to use a two hole termination kit. The face plates help cover unsightly bore holes created during the pipe installation. They are available in both white and grey to match the certified vent pipe, and each plate includes a self sealing foam back.

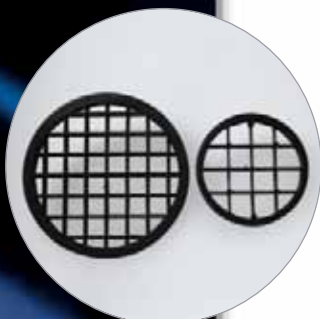

Round Face Plates	
Size	Product Code
2"	196063
3"	196064
4"	196055
2"	* 197053
3"	* 197054
4"	* 197055

* Grey to match CPVC

Rectangular 2 Hole Face Plates

These white PVC finishing plates are available in 3 sizes and include a self sealing foam back. They are perfect for side wall applications that require terminations that the Side Wall Kits cannot accommodate. The face plates can be used with PVC or CPVC venting as they do not contact the flu gas, and can be painted to suit the application.

Rectangular 2 Hole Face Plates	
Size	Product Code
2"	196216
2-1/2"	196218
3"	196219
